

Discover New Career Opportunities with New Found Gold!

We are Hiring Metallurgist – Pine Cove

At New Found Gold, we're on a mission to uncover the treasures hidden beneath the Earth's surface. As a leading gold exploration company, we combine cutting-edge technology with geological expertise to discover and develop world-class mineral resources. Our values—integrity, sustainability, and innovation—guide every step of our journey.

We are looking for an experienced Metallurgist to support New Found Gold's mill operations located at Pine Cove near the town of Ming's Bight on the Baie Verte peninsula. The Pine Cove gold mill is a key part of the Company's plan to operate the Hammerdown Gold Project in the Baie Verte mining district of Newfoundland and Labrador. This position offers a unique opportunity to play a critical role in continuing the New Found Gold's gold mine production.

Reporting to the Mill Manager, the Metallurgist is responsible for optimizing metallurgical processes to support to the Pine Cove mill maintenance and operations.

Your Role in the Expedition:

As a Metallurgist, you'll be part of a dynamic team. Your responsibilities will include:

- Monitoring and optimizing metallurgical processes to ensure efficient gold recovery.
- Conducting sampling and analysis of ores and concentrates.
- Troubleshooting operational issues in milling and refining processes.
- Collaborating with maintenance teams to improve equipment performance.
- Preparing technical reports and recommending process improvements.
- Ensuring compliance with safety and environmental standards.
- Other related duties as required.

What You Bring to the Field:

- Bachelor's degree in metallurgical engineering, Mineral Processing, Chemical Engineering, or a related field.
- Minimum 3–5 years of experience in mineral processing or gold milling operations.
- Experience with a Merrill Crowe Process would be an asset.
- Strong knowledge of metallurgical processes, including crushing, grinding, flotation, and leaching.
- Proficiency in sampling, assay techniques, and process optimization.
- Familiarity with metallurgical software and data analysis tools.
- Excellent communication skills (oral and written).
- Ability to work collaboratively and positively with team members.
- Flexibility to work varied hours as needed.
- Commitment to safety and environmental compliance.
- Strong analytical and problem-solving skills.

Benefits of this Opportunity:

We believe in rewarding our team for their hard work and dedication. Here's what you can expect:

- Competitive compensation and performance bonuses
- Comprehensive health, dental, and vision insurance
- Vacation and paid time off
- Professional development and training opportunities
- Travel allowances and field gear support
- Safety-first culture
- Adventure in some of the most geologically rich regions on Earth

The Terrain Ahead:

- Work Environment: Remote field sites, travel required, rugged terrain
- Employment Type: Full-time
- Location: Pine Cove Mill, Ming's Bight, Baie Verte Peninsula.
- Posting Date: December 5, 2025
- Closing Date: December 19, 2025

Ready to explore new horizons?
