

Discover New Career Opportunities with New Found Gold!

We are Hiring – Regional Exploration Project Geologist

Hammerdown Project - King's Point, NL

At New Found Gold, we're on a mission to uncover the treasures hidden beneath the Earth's surface. As a leading gold exploration company, we combine cutting-edge technology with geological expertise to discover and develop world-class mineral resources. Our values— Leadership, Safety, Sustainability, Community and Courage—guide every step of our journey.

We are seeking an experienced Regional Exploration Project Geologist to play a key role in advancing the Hammerdown regional exploration strategy. Based at our Hammerdown Project near King's Point, Newfoundland and Labrador, this position is responsible for designing and executing exploration drilling programs, generating and advancing exploration targets, integrating multidisciplinary datasets, and contributing to the development of a district-scale geological understanding.

The successful candidate will work closely with the Exploration Manager to lead regional geological compilation efforts, undertaking comprehensive 3D geological modelling. This role will contribute directly to identifying and prioritizing drill targets in preparation for the Company's next phase of regional exploration and resource growth.

This is an excellent opportunity for an exploration geologist who enjoys combining field execution with technical interpretation and who is excited by the opportunity to make meaningful discoveries within a highly prospective orogenic gold district.

Your Role in the Expedition:

As the Project Geologist, you'll be part of a dynamic team. Your responsibilities will include:

Regional Exploration

- Design, coordinate and execute regional diamond drilling programs.
- Supervise drilling contractors and daily drilling activities while ensuring safe and efficient operations.
- Coordinate geological logging, sampling, QA/QC and geological data collection.
- Conduct geological mapping, prospect evaluations and field investigations.
- Interpret lithology, alteration, mineralization and structural geology from drilling and field observations.
- Integrate geological, structural, geochemical and geophysical datasets into exploration interpretations.
- Generate, rank and refine exploration targets for follow-up drilling.
- Participate in property-scale geological compilation and interpretation.
- Assist in developing exploration strategies and annual drill plans.

Geological Interpretation & 3D Modelling

- Develop and continuously refine 3D geological models using Leapfrog.
- Lead geological and structural interpretations to improve the understanding of the Hammerdown district.
- Participate in the complete remodelling of the Hammerdown deposit.
- Integrate historical exploration data into updated geological models.
- Support resource modelling and future resource estimation updates.
- Collaborate with GIS and Data Management teams to maintain high-quality geological databases.
- Review analytical results and QA/QC performance to ensure data integrity.

Technical Leadership

- Mentor junior geologists, students and geological technicians.
- Provide technical guidance during drilling campaigns.
- Assist in developing exploration standards, workflows and best practices.
- Prepare technical reports, presentations and exploration summaries.
- Participate in exploration budgeting, scheduling and contractor management.
- Foster a strong safety culture while promoting teamwork and continuous improvement.

What You Bring to the Field:

- Bachelor's degree in Geology, Earth Sciences or related discipline.
- Eligible for registration as a Professional Geoscientist (P.Geo.) in Newfoundland and Labrador or another Canadian jurisdiction.
- Minimum 10 years of mineral exploration experience.
- Demonstrated experience managing diamond drilling programs.
- Strong understanding of structural geology and ore controls.
- Experience with Leapfrog Geo and other 3D geological modelling software.
- Experience with ArcGIS/QGIS and geological database management.
- Strong understanding of QA/QC principles and geological data validation.
- Excellent written and verbal communication skills.
- Strong organizational skills with the ability to manage multiple priorities.
- Valid driver's licence.

Preferred Provisions:

- Experience exploring structurally controlled and/orogenic gold deposits.
- Experience in both greenfield and brownfield exploration environments.
- Demonstrated success in regional target generation and drill target definition.
- Experience integrating structural geology, geochemistry and geophysics into exploration models.
- Experience developing district-scale geological models.

- Experience mentoring junior geologists and technical staff.
- Experience preparing NI 43-101 technical documentation or supporting resource estimation programs.

The Terrain Ahead:

- Work Environment: Remote field sites, travel required, rugged terrain.
- Employment Type: Full-time
- Location: King's Point, NL, Hammerdown Project.
- Posting Date: July 6, 2026

Why Join Hammerdown?

Hammerdown represents one of Atlantic Canada's most exciting gold exploration and development opportunities. While supporting the continued growth of the existing deposit, the exploration team is actively advancing district-scale geological understanding and developing the next generation of drill targets across a highly prospective land package.

As part of a growing technical team, you will have the opportunity to:

- Play a leading role in shaping the exploration strategy for the Hammerdown district.
- Contribute to a complete geological remodelling of the deposit using modern geological modelling techniques.
- Work on a structurally complex orogenic gold system with significant exploration upside.
- Help generate and test new regional exploration targets.
- Collaborate with an experienced multidisciplinary technical team.
- Grow into increasing technical and leadership responsibilities as the exploration group expands.

If you are passionate about discovery, enjoy solving complex geological problems, and want to help build the next chapter of exploration success at Hammerdown, we encourage you to apply.

Ready to explore new horizons?

How to Apply:

Send us an email with your resume and cover letter to careers@newfoundgold.ca or fill out our contact form at this link <https://newfoundgold.ca/contact/careers-opportunities/>.

Please indicate the position you are applying for in the subject line of your email or in the message with your resume

We thank all applicants for their interest; however, only those selected for an interview will be contacted.
